## Details

### - Reinforced Trailer Construction:

The lower sides of the hot dog trailer feature a checker plate, a kind of durable stainless steel with a raised diamond pattern. This reinforced covering acts as a shield to safeguard against the damaging impact and corrosive effects of slurry splashes. It can prolong the trailer's lifespan while ensuring its structural integrity remains intact.

### - 3 Compartment Water Sink:

The water sink has three compartments, each for specific cleaning tasks. Faucets are rotatable, so they can be used in any compartment. Near the sink, a drainboard is used to dry dishes by channeling water dripping from the dishes back into the sink. Additionally, a side splash guard that separates the 3 compartment water sink and hand sink, preventing cross-contamination and promoting a clean and sanitary workspace. Made from non-porous, durable stainless steel, every surface of our water sink is designed for long-lasting performance and easy maintenance.

### - Standard Gas Piping:

Our hot dog concession trailer comes equipped with a standard gas piping system that connects the gas grill and fryer. The piping is concealed beneath the countertop, ensuring a clean and neat kitchen. On the exterior of the trailer, there is a gas valve for connecting your propane gas tanks.

### - Commercial Grill and Fryer:

The standard specification of the hot dog concession trailer includes a restaurant-quality countertop grill and fryer, both powered by natural/propane gas. Additionally, we offer the option for electric alternatives, ensuring flexibility to meet your specific needs.

### - Fire Suppression Hood:

The commercial range hood in the small concession trailer has a fire suppression system with a smart sensor. This advanced system actively monitors and detects fires and swiftly takes measures to extinguish them within seconds, ensuring a safe cooking environment in the small concession trailer.
