Features

➔ The small shipping container food trailer is the project of shipping container conversion. We build a brand new container and then turn it into a functional kitchen by wiring, plumbing, cutting doors and concession windows, and installing the kitchen equipment, floor, and insulation. The process is flexible, allowing for the customization of the shipping container food trailer floor plan.

➔ **- Electrical -**

The shipping container food trailer is properly wired and installed with an electrical panel, US electrical outlets, switches, receptacles for the generator, circuit breakers, and LED lighting units by our certified electricians so any additional electrical appliances can run safely in it when you plug them in.

➔ **- Water Sink System -**

According to health codes and regulations in the US, the shipping container food trailer is properly outfitted with a 3 compartment water sink and a hand sink, with auxiliary equipment including plumbings, faucets, water pumps, water heaters, clean water tanks, waste water tanks.

➔ **- Layout -**

Designed to meet the demands of commercial kitchens, this sink features three separate compartments for efficient cleaning tasks. Equipped with a drainboard and splash guard, it guarantees a clean and safe workspace. Plus, enjoy the convenience of an additional hand sink nearby. Positioned near the cooking area, all sinks provide easy access to clean water, facilitating both cooking and thorough cleaning processes.

*** The customization of the small shipping container food trailer specification, layout, and design is available.**
